Note

Vide our letter No 1039/85 dated 27-5-94 showing that according to the Collector of Malabar 4 elephants were seized at Pallipuram by the Mysore Govt per No 4925 while according to Mr Rhedda Rao only one had been seized per No 1150.

This was followed up by letter No 1184/99 dated 10-10-94 which showed that the difference between the figures given above was due to the fact that the Collector had seized against the Mysore Govt 3 elephants which did not belong to it & were not seized by it but belonged to & were seized by the Travancore Govt.

Our No 2817/5790 dated 15-8-94 from the Resident Mysore to the Chief Secretary to Government Madras Govt stated that the Mysore Govt had nothing to do with the 3 elephants seized by the Travancore Govt. These 3 elephants were released by the Mysore Govt. Vide the subsequent correspondence which took place on the subject.

It may be asked what the Madras Govt may be informed that 3 out of the 4 elephants in question (which were seized by the Travancore Govt & then released) belonged not to

As requested by the Municipal Council I wrote to the Shanmugam Mudaliar to find out the amount of net profits realised by the Fruit Inspector & to remit the income tax payable thereon. His reply is submitted. It shows that the net profits were very much below Rs 500 - No tax is therefore leviable. That being so, I beg to suggest that at this distance of time, no communication to the Mudaliar is desirable.

2. In the above letter the Superintendent says "Instead of "engaging one full truck for a "single Government Elephant, I "arranged with field Inspector's "brother to lend half of the truck "on condition of paying proportionate charge from the Govern- "ment". But from the details of charges debited in the Working charges bill for September 1894, it would appear that two trucks were engaged for five Elephants removed from the whitefield of which only one belonged to Government and the others (calves) to field Inspector's brother, loaded in one truck and that moiety of cost was recovered from the latter

2. Regarding the Superintendent's letter No 123, dated 5th February last, I have to observe that the elephants referred to in my docket to which the said letter is a reply, were Nos 3, 4 and 5 and not Nos 1, 3, and 5 reported

upon

upon by the Superintendent, and this has been pointed out calling for full particulars as regards No 4 elephant. In letter No 6, dated 2nd July 1894, the Superintendent has reported that Nos 1, 3 & 4 elephants died of "Lurza". No 1 died at Kattamalaiwaddi in the Hunsur Taluk. Nos 3, 4 as also 5 are stated to have died at Oolwakode near Palghat; but the death of only No 3 (Tusker) was duly reported to me on the 26th April 1894. The Superintendent explains that through oversight he failed to report the deaths of the other two but he should have been more particular in reporting the Casualties occurring in a distant foreign country. Of these 3, one was a tusker, the other a mucknа and the third a female all measuring 8 ft. in height all in good condition when caught in January 1894. It is reported that Rs 130/- was realized from the tusks of the deceased elephant No 3.

to be in perfect health they suddenly begin to shiver, water oozing out from their mouth and die at once. This appears to come all on a sudden from cold. Last year, two elephants died at palghat from the same disease. I examined one of them and found the tongue and mouth of the animal becoming quite black. Whenever this disease attacks no time is found to give any treatment. Some remedy will have to be found after the "Gajayurvedam" book is translated.

I herein enclose the translation of a statement of one of the Mahouts who is well acquainted with the elephant diseases and their treatment. Of the 4 elephants one was tusker. Its tusks weighed 26 ttes realising Rs 730/- at 5 Rs per tte
